

Checkweighers
Advance-Line Series

DACS-G-F

Delivering accuracy with speed

Where precision checkweighing at speeds of up to 600 packs per minute is needed, Ishida Advance-Line checkweighers offer the ideal solution.

- ▲ Front USB for the storage of production data
- ▲ 250 programmable presets
- ▲ 7" Jog dial/12.1" CTS screen
- ▲ Integrated Metal Detector option
- ▲ Automatic Reject options
- ▲ Flexible configuration
- ▲ IP30 Rating

Typical system

Specifications

	DACS-G-F015				DACS-G-F030
	MID		Non-MID		Non-MID

Ishida Advance-Line Checkweighers

Every Ishida checkweigher system is configured and designed to suit the application. From a brand-new production line to integration into an existing one. Advance-Line Checkweighers can be configured to weigh only, weigh and reject, or incorporate a metal detector for a complete system.

Features & Benefits

Reject Systems

Arm - Ideal for boxes and bags. The non-compliant product is pushed off the side of the reject conveyor.

Air Jet - Suitable for small lightweight packaged products. The non-compliant product is blown off the side of the reject conveyor.

Pusher Reject - Suitable for heavy weight products including boxes and bags

Reject Bins & Roller Track

Reject Bins - For holding rejected product. The bin is supplied with a lockable door.

Gravity Roller Track - For holding rejected product. Ideal for open trays and boxes.

Weighing Flexibility

From the ability to utilise the checkweighers weigh data controls for other third party equipment to application specific software. The Advance-Line checkweigher can be built to a specification that meets production requirements.

Weight Compliance

The Advance-Line checkweigher is approved in accordance with WELMEC and OMIL Directives

Peace of Mind

Verifying and checking 100% of products, the system helps support batch and regional weight compliance.

Trusted Partner

We developed our first checkweigher in 1975 and have continued to develop systems with the same level of quality and focus. All Ishida checkweighers contain our own developed and manufactured software, electronics and weigh cells.
